

Sapphire Token (SST): Empowering a Mobile Gaming Ecosystem

A Unified Currency for Seamless Gaming Experiences

May 21, 2025

1 What is Sapphire Token?

Sapphire Token (SST) is the cornerstone of our innovative mobile gaming ecosystem, centered around *Gold Inc.* and extending across a growing portfolio of interconnected games. With a fixed supply of 10 billion tokens, SST is a scarce, player-driven digital currency exclusively mined within *Gold Inc.*, our flagship mining-strategy game. This unique distribution method ensures that every token in circulation is earned through active gameplay, fostering a vibrant, player-centric economy that rewards skill, strategy, and engagement. SST powers purchases, trading, and asset ownership across all our titles, creating a seamless gaming universe.

2 Tokenomics: A Balanced Distribution Model

Sapphire Token has a fixed total supply of 10 billion tokens, strategically allocated to ensure ecosystem growth and sustainability:

- **51% (5.1B tokens):** Distributed through mining in *Gold Inc.*, rewarding active players.
- **15% (1.5B tokens):** Allocated for a coin distribution event to boost early adoption.
- **10% (1B tokens):** Reserved for ecosystem development, supporting new games and features.
- **15% (1.5B tokens):** Allocated to the team for long-term project support.
- **9% (900M tokens):** Dedicated to community initiatives and advisors to foster growth.

This balanced approach ensures that the majority of tokens are in players hands, driving organic demand and value.

3 Key Use Cases of Sapphire Token

SST is a versatile currency with a wide range of applications across our ecosystem, empowering players and enhancing gameplay:

- **Digital Assets:** Purchase unique limited collections, like Founders Passes and Stellar Founders Ships, usable across all games.

- **Player Ownership:** Own assets and accounts via on-chain verification, enabling true ownership through NFTs.
- **Marketplace Trading:** Trade ecosystem assets in an exclusive marketplace using SST, with a transaction tax that burns tokens.
- **Consumable Items:** Buy one-off in-game items that require regular SST use, driving consistent demand.
- **Cosmetics:** Acquire limited skins, flags, emblems, and avatars to personalize your gaming identity.
- **VIP Perks:** Access season passes and VIP tracks for exclusive in-game benefits.
- **Redeemable for Game Credits:** Convert SST to game credits (200 SST = \$1) for universal in-game purchases.
- **Wagering:** Wager SST in high-stakes 1v1 battles, adding competitive excitement.
- **Rewards:** Earn SST through leaderboards, challenges, and events, incentivizing engagement.

4 Vision: A Unified Mobile Gaming Ecosystem

Our vision is to create a thriving mobile gaming ecosystem powered by Sapphire Token, where SST serves as the universal currency across multiple games. From *Gold Inc.* to upcoming titles like *Stellar Extraction*, SST enables endless purchases, trading, and asset interoperability, connecting players in a seamless universe. As we expand our game portfolio, SST will grow in utility, fostering a player-driven economy where every transaction enhances the gaming experience.

5 Roadmap for Ecosystem Growth

Our roadmap outlines key milestones to scale the Sapphire Token ecosystem through 2026:

- **Q3 2025:** Fully launch *Gold Inc.* with web3 integration, continue *Stellar Extraction* development, and release Sapphire Pass, *Gold Inc. Genesis* collections, and consumables for *Gold Inc.*.
- **Q4 2025:** Launch early access for *Stellar Extraction*, begin development on Game 3, and release the Stellar Founders Ships collection alongside initial consumables for *Stellar Extraction*.
- **Q1 2026:** Expand marketplace features with advanced trading tools and increased NFT liquidity, and host the Stellar World Championships to boost engagement.
- **Q2 2026:** Drive benefits for holding NFT collections and marketplace usage, increasing player engagement with SST, digital assets, and consumables.

- **Q3 2026:** Achieve 500,000 monthly active users (MAUs) across the ecosystem, solidifying our presence in mobile gaming.

6 Our Games: The Core of the Ecosystem

6.1 Gold Inc.

Gold Inc. is a mobile MMORTS where players mine resources, forge global alliances, and battle for strategic points in a dynamic world. Key features include:

- Mine over 21 different resources to fuel your empire.
- Build massive global alliances to dominate the battlefield.
- Control strategic points of interest for exclusive rewards.
- Mine gold to earn SST, the ecosystems unified currency.
- Unlock limited collections like Dredges for advanced water mining.

6.2 Stellar Extraction (In Development)

Stellar Extraction is a cosmic mining adventure where players navigate interstellar challenges to gather rare materials. Players can use SST to acquire unique assets like Stellar Founders Ships, trade in the marketplace, and enhance their gameplay across our interconnected gaming universe.

7 Marketplace: Trading and Token Burns

The Sapphire Token Marketplace is the central hub for trading ecosystem assets on-chain. Players buy, sell, and trade items like skins, consumables, and limited collections using SST. A transaction tax on each trade burns SST, reducing the overall supply over time and increasing scarcity, which drives long-term value for the token.

8 Security and Blockchain Integration

The Sapphire Token ecosystem leverages blockchain technology to ensure secure, transparent transactions. SST and NFT assets are managed on a robust blockchain, with smart contracts audited for security. On-chain verification enables true player ownership, while wallet integrations provide seamless access to the marketplace, fostering trust and protecting user assets.

9 SST Distribution: Controlled Mining in Gold Inc.

SST is exclusively mined through gameplay in *Gold Inc.*, with a slowing distribution curve designed to ensure sustainability. Early players earn SST at a higher rate, but as the ecosystem matures, the distribution rate decreases, reducing the influx of new tokens and aligning with the fixed 10 billion token supply.

10 Growing Demand for SST

As we add more games to the ecosystem, the demand for SST grows exponentially. From *Gold Inc.* to *Stellar Extraction* and beyond, SSTs utility for purchases, trading, and wagering increases with each new title. With a slowing supply curve due to controlled distribution and marketplace burns, this growing demand positions SST for significant value appreciation.

11 Mobile Gaming Market: A Massive Opportunity for SST

11.1 The Scale of Mobile Gaming in 2025

The mobile gaming industry is a global powerhouse, driven by widespread smartphone adoption. As of 2023, there were approximately 8.9 billion mobile phone subscriptions worldwide, a number we estimate has grown to 9.2 billion by 2025 due to rising accessibility and population growth. Of these, 3.5 billion people are active mobile gamers in 2025, according to industry projections, representing a significant portion of smartphone users. This vast market, generating over \$110 billion in revenue, offers a tremendous opportunity for Sapphire Token (SST) to capture a meaningful share and drive value for our ecosystem.

11.2 Simulating Market Share Impact

If our ecosystem, starting with *Gold Inc.* and expanding through titles like *Stellar Extraction*, captures just 0.01% of the 3.5 billion mobile gamers, we would onboard 350,000 active players. These players would engage with SST to mine, trade, and purchase assets across our games, including limited NFT collections like the Sapphire Pass and Stellar Founders Ships. With an estimated 10% of these players actively trading in our marketplace each transaction burns a small amount of SST the circulating supply would gradually decrease, potentially increasing SST's value due to heightened scarcity and demand.

11.3 Driving Value for NFT Assets and SST

This influx of players would also boost the value of our NFT assets. As 350,000 users compete for exclusive collections like *Gold Inc. Genesis* equipment or Dredges, the scarcity of these limited items could drive their market value higher, benefiting early adopters and traders. Increased demand for SST to acquire these NFTs, coupled with marketplace burns, creates a virtuous cycle: more players lead to higher SST utility, reduced supply, and greater value for both the token and our digital assets, positioning SST as a key player in the mobile gaming economy.

12 Player Engagement Metrics

Building on our market share simulation, we project significant engagement as the ecosystem grows. With 350,000 active players, we anticipate 50,000 daily active users (DAUs) in the first year, driven by *Gold Inc.* and the upcoming *Stellar Extraction* launch. These

players are expected to generate 10,000 daily marketplace transactions, burning approximately 250,000 SST per day, further reducing supply and enhancing token value.

13 Upcoming Limited Collections

We're excited to introduce exclusive, limited-edition collections purchasable with SST, each offering unique benefits:

- **Sapphire Pass:** Grants exclusive perks like SST earnings, free VIP access, early game access, private chats, and whitelist spots, with benefits growing over time.
- **Gold Inc. Genesis:** Unlocks exclusive equipment for enhanced mining in *Gold Inc.*
- **Dredges:** Limited items for water mining operations in *Gold Inc.*
- **Stellar Founders Ships:** Unique, custom ships for *Stellar Extraction*, offering early adopters a cosmic edge.

14 Community Building Initiatives

The 9% token allocation for community and advisors will fuel engagement initiatives. We plan to introduce governance programs, allowing players to vote on ecosystem features, and ambassador roles to reward active community members. Events like leaderboards and challenges will incentivize participation, fostering a loyal player base that drives long-term growth.

15 Team Funding: Sustainable Growth Through Game Revenue

Our team is committed to being 100% funded by game revenue, not token sales. This approach ensures organic growth for SST, as revenue from *Gold Inc.*, *Stellar Extraction*, and future titles reinvests into ecosystem development, fostering a sustainable token economy that thrives over the long term.

16 Competitive Advantage: Why SST Stands Out

Sapphire Token (SST) differentiates itself in the crowded gaming token market through its unique mining-based distribution, seamless interoperability, and focus on mobile MMORTS experiences. Unlike many gaming tokens that rely on speculative trading, SST is earned exclusively through gameplay in *Gold Inc.*, ensuring a player-driven economy. Its ability to power purchases, trading, and asset ownership across multiple games, combined with marketplace burns that reduce supply, positions SST as a leader in creating sustainable value for players and investors in the mobile gaming space.
